**Subject:** Mine Plan Determination - 2nd Dugout Canyon

Attached is OSM's final decision regarding the need for a Mining Plan Modification for the above subject. A signed copy will be sent to you in today's mail.

In accordance with the Federal regulations under 30 CFR 740.13(d), other Federal agencies that may have an interest in, or jurisdiction over, the above subject operation have also been notified of OSM's decision electronically.

No responses to this transmittal are necessary.

RE: Canyon Fuel Company, LLC. - "Dugout Canyon" Mine - Application for a Permit  
Revision, Waste Rock Analyses

Dear Sir or Madam:

This is in response to the Utah Division of Oil, Gas, & Mining's (UT-DOGM) July 29, 2005, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Waste Rock Analysis, has determined that it proposes to add waste rock analyses as RA Attachment 5-4 to the approved permit application package for the Dugout Canyon mine, Utah State permit C/007/039.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal does not meet the requirements of 30 CFR 746.18(d). Therefore, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval.

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Waste Rock Analyses, with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the July 29, 2005, request to the Bureau of Land Management and the U.S. Forest Service for their review and comment.

In an electronic transmittal dated July 29, 2005, the U.S. Forest service stated it had no

comments or concerns with the permit revision.

In an electronic transmittal dated August 2, 2005, the Bureau of Land Management stated in its opinion the permit revision did not constitute a mining plan action requiring Secretarial approval.

Please notify the applicant of our decision on this matter.

Should you have any questions regarding this letter or approval, please contact Carl R. Johnston, Utah Federal Lands coordinator, at (303) 844-1400, extension 1500.

Sincerely,

Ranvir Singh  
Manager, Northwest Branch
